

BS in Electrical Engineering (393550) MAP Sheet

Engineering and Technology, Electrical and Computer Engineering

For students entering the degree program during the 2017-2018 curricular year.

University Core and Graduation Requirements				Suggested Sequence of Courses			
University Core Requirements:				FRESHMAN YEAR			
Requirements	#Classes	Hours	Classes	<u>1st Semester</u>		JUNIOR YEAR	
Religion Cornerstones				First-year Writing or American Heritage		<u>5th Semester</u>	
Teachings and Doctrine of The Book of Mormon	1	2.0	REL A 275	MATH 112	3.0	EC EN 330	4.0
Jesus Christ and the Everlasting Gospel	1	2.0	REL A 250	CHEM 105	4.0	EC EN 340	4.0
Foundations of the Restoration	1	2.0	REL C 225	C S 142	3.0	EC EN 380	4.0
The Eternal Family	1	2.0	REL C 200	EC EN 191	0.5	EC EN 391	0.5
The Individual and Society				Religion Cornerstone course		Total Hours	
American Heritage	1-2	3-6.0	from approved list	Total Hours	16.5	<u>6th Semester</u>	
Global and Cultural Awareness	1	3.0	from approved list ‡	<u>2nd Semester</u>		EC EN 360	4.0
Skills				C S 235		STAT 201	
First Year Writing	1	3.0	from approved list	MATH 113	4.0	EC EN 390	3.0
Advanced Written and Oral Communications	1	3.0	ENGL 312* or 316*	PHSCS 121	3.0	University Core requirement	3.0
Quantitative Reasoning	1	4.0	MATH 112* or 113*	First-year Writing or American Heritage		Religion elective	
Languages of Learning (Math or Language)	1	4.0	MATH 112* or 113*	Religion Cornerstone course		Total Hours	
Arts, Letters, and Sciences				Total Hours		15.0	
Civilization 1	1	3.0	from approved list ‡	SOPHOMORE YEAR			
Civilization 2	1	3.0	from approved list ‡	<u>3rd Semester</u>			
Arts	1	3.0	from approved list ‡	EC EN 220		ECEn 475	
Letters	1	3.0	from approved list ‡	MATH 313	3.0	Technical elective	
Biological Science	1	3.0	from approved list ‡	PHSCS 220	3.0	Technical elective	
Physical Science	2	7.0	CHEM 105* or 111* and PHSCS 121*	University Core requirement		Technical elective	
Social Science	1	3.0	from approved list ‡	University Core requirement		University Core requirement	
Core Enrichment: Electives				Total Hours		17.0	
Religion Electives	3-4	6.0	from approved list	<u>4th Semester</u>			
Open Electives	Variable	Variable	personal choice	EC EN 240		EC EN 476	
FOR GE QUESTIONS CONTACT THE ADVISEMENT CENTER — FOR PROGRAM QUESTIONS SEE YOUR DEPARTMENT ADVISOR				MATH 314		Technical elective	
*THESE CLASSES FILL BOTH UNIVERSITY CORE AND PROGRAM REQUIREMENTS (16–17 hours overlap)				MATH 334		Technical elective	
‡REDUCTION OF TOTAL CREDITS IS RECOMMENDED by choosing a Civilization 2 course that also double counts for the Arts requirement (if a separate Letters course is taken) or the Letters requirement (if a separate Arts course is taken) --- see the University Core list for specifics. EngT 231 double counts for the Global & Cultural Awareness and the Social Science requirements.				University Core requirement		ENGL 312 or 316	
Graduation Requirements:				Religion elective		Religion elective	
Minimum residence hours required		30.0		Total Hours		16.0	
Minimum hours needed to graduate		120.0		*Actual course sequences should be adapted to individual needs. For example, students with AP credits in Math, Physics, or Computer Science will already have credit for some initial courses. Many students find it beneficial to attend one or more spring or summer terms. On average, students take about nine semesters to graduate in this program.			
				Note: Students are encouraged to complete an average of 16 credit hours each semester or 32 credit hours each year, which could include spring and/or summer terms. Taking fewer credits substantially increases the cost and the number of semesters to graduate.

BS in Electrical Engineering (393550)

2017-2018

THE DISCIPLINE:

Electrical and Computer Engineering is one of the most exciting, diverse, and forward-looking disciplines offered at the university. Contemporary society is in the midst of an information revolution, created in large part from the fruits of electrical and computer engineering. Electrical and computer engineers have been primary contributors to the astonishing developments in communication, computer, and network technology. They have designed devices and systems that have a significant impact on manufacturing, medicine, transportation, and environmental monitoring. Smart phones, tablets, digital cameras, high definition television, solar power, microprocessors, lasers, unmanned air vehicles, medical imaging systems, and autonomous robotic systems are all examples of devices and systems designed by electrical and computer engineers. Innovations that flow out of electrical and computer engineering sustain the national economy and improve the quality of life for people throughout the world. In the future, society will look to electrical and computer engineers to address grand challenges ranging from sustainable and efficient energy to health care technologies and global communications networks.

The Department of Electrical and Computer Engineering at Brigham Young University offers accredited degrees in Electrical Engineering and Computer Engineering. Electrical Engineering focuses on microelectronics, electromagnetics, electronic circuits, wireless communications, signal processing, biomedical applications, photonics, and controls. Computer Engineering focuses on the design of digital computing devices and systems and involves hardware and software, operating systems, digital logic, real-time systems, and computer vision. Both programs combine fundamental principles with hands-on learning, including an innovative Junior Core experience that integrates classroom knowledge with project-based learning.

CO-OP AND INTERNSHIP EXPERIENCES:

Optional co-op and internship experiences with engineering firms throughout the USA are available. These experiences may extend over one semester plus the spring/summer terms, for a total of eight months.

PROFESSIONAL AND HONOR SOCIETIES:

The student chapter of the Institute of Electrical and Electronic Engineers is the professional organization; Eta Kappa Nu is the electrical and computer engineering honor society; and Tau Beta Pi is the honor society for all engineering fields.

CAREERS:

Electrical and computer engineers are among the most actively recruited students graduating from a four-year program. Baccalaureate engineers typically start their careers as members of project teams with one or more of the following responsibilities: designing digital, analog, or opto-electronic circuits; creating or testing applicationspecific software; testing components or systems; or providing technical support for sales. Later on, many engineers find themselves pursuing managerial careers, starting their own companies, or even managing entrepreneurial funds. Top graduates are also well received by medical schools, law schools, and professional and management programs.

The Electrical Engineering baccalaureate program is accredited by the Engineering Accreditation Commission of ABET, Inc., <http://www.abet.org>.

MAP DISCLAIMER

While every reasonable effort is made to ensure accuracy, there are some student populations that could have exceptions to listed requirements. Please refer to the university catalog and your college advisement center/department for complete guidelines.
